PROFILE

Product Designer focused on product and design systems, with a technical base that lets me work alongside engineering instead of handing over mockups. I founded and design Kio —eight epics for three roles and a design system of 100+ components (250 counting variants) synced to code— and I built the agent system that designs my own products. Before that I sold to companies for over five years: I understand how a client buys and what they expect from a product.

EXPERIENCE

Product Designer & Founder — Kio Jun 2025 — present

KIO PLATAFORMA EDITORIAL SL · CIF B22730030 · Valencia

Founded the company and lead product and design: eight epics for three roles — creator, reader and guest—, from the technical foundations to search. I also defined the design principles and the flow standard the team uses today.
Design system of 100+ components (250 counting variants): library published in Figma and synced to code with engineering —semantic tokens, light/dark theme, Storybook—, packaged in an Azure DevOps pipeline.

Product Designer & Founder — Flash Prop May 2025 — present

Real-estate digital studio · Valencia

Designed an automated editing pipeline with two agents: one diagnoses each photo and a second audits the whole set and issues a verdict. Ten projects and over 300 photos delivered.
Product, brand and identity, all *design first*; plus the extension to video from stills and to AI home staging.

Sales Advisor and Head of Digital Advertising — Inmobiliaria ASKA May 2023 — May 2025

Sales and Business Development Executive — Doctor Films Argentina Sep 2020 — Jan 2023

Marketing and Digital Content Assistant — Adelaide Digital Hub May 2019 — Apr 2020

OWN PROJECTS

Boty — agent system 2025 — present

System design · daily own use

Designed the interaction model: autonomy levels, per-tool permissions, where human review comes in and what happens when the model fails.
Identity, memory and rules in versioned, model-agnostic files — later replicated by a third party, who founded an AI-agent company on that base.

Neopress — a personal newspaper that writes itself 2026

Product and editorial design · open source

Source-collection and AI-editing pipeline, and a reading interface built for e-ink.

SKILLS

Product Design · Design Systems · Figma · Prototyping · UX/UI · Design Tokens · HTML · CSS · Applied AI · Agent design

Strengths. Judgement to decide with incomplete information · Communication with engineering · Direct work with B2B clients · Autonomy: I founded and run two projects of my own · Product writing

EDUCATION & LANGUAGES

Higher Vocational Diploma in International Trade — IBE Formación (2023 — 2025) · Google IT Support Professional Certificate — Google (2020) · Languages: Spanish (native) · English (fluent)
